

Metal Seated Gate valves

Zero-Leakage Isolation

Metal Seated Gate valves are widely used for pipeline isolation in the water industry, typical applications include pump suction, pump discharge and upstream control valve isolation for large bore sizes.

Series 3411

Size:

36" - 108";
DN900 - DN2700

Material:

Ductile iron

Pressure Rating:

Up to 26 bar

Medium Velocity Discharge Capability:

Up to 12m/sec
