

# Submerged Discharge Valve

---

## Maximum Silence

---

The Submerged Discharge valve offers a quiet and compact discharge footprint. Typically used in dams and reservoirs to substantially increase their drawdown capacity in emergency situations where space is at a premium.

### Series 3200

#### Size:

8" - 80";  
DN200 - DN2000

#### Material:

Ductile iron,  
Cast Steel &  
Stainless Steel

#### Pressure Rating:

Up to 20 bar

#### Medium Velocity Discharge Capability:

Up to 6m/sec

#### High Discharge Capacity:

$k=1.62$
